Server Support Specialist

## NETWORKING SPECIALIST CARLY PATRICIA MARSH

Keeping ahead of the speed of business means delivering first class network performance – at peak demand times as well as average utilization levels. With the rapidly increasing levels of data exchange required to support business operations, upgrading your network is one key way to ensure superior application performance, business productivity and user satisfaction.

### TECHNICAL SKILLS

- Designing and implementing purpose built, cost effective, high performance networks that meet business requirements.
- Research, trial, and adoption of emerging technologies.
- Sustainment of network infrastructure through life cycle, NMS, RMA, problem resolution, escalation and incident management.
- 2nd tier escalation for technicians and support staff in network and other verticals.
- Presentation and Reporting for incidents, project briefing, status and knowledge transfer
- High technical proficiency in MPLS, QoS, BGP, OSPF, ACL's, Cisco IOS, LAN/WAN, Nexus Datacenter, UCS, VoIP, CUCM, SCADA systems, design and testing.

### SOME OTHER SKILLS...

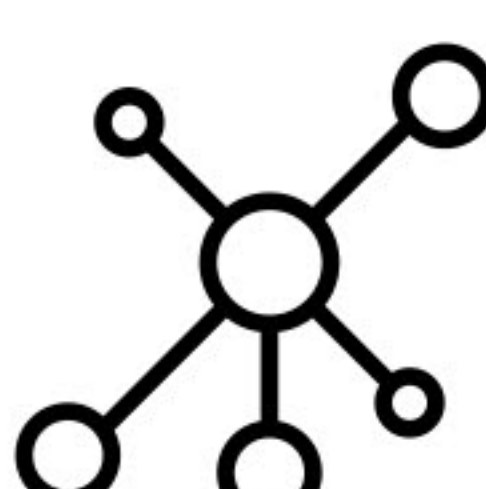

Management

Works well  
under pressure

Troubleshooting

Network Knowledge

### CERTIFICATIONS

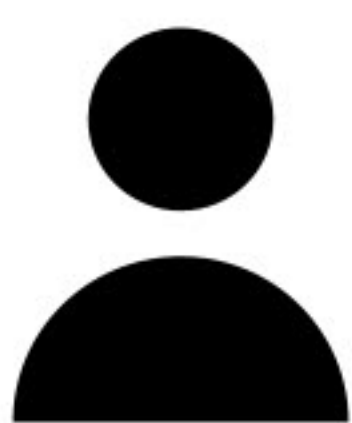

Cisco Certified Design Professional

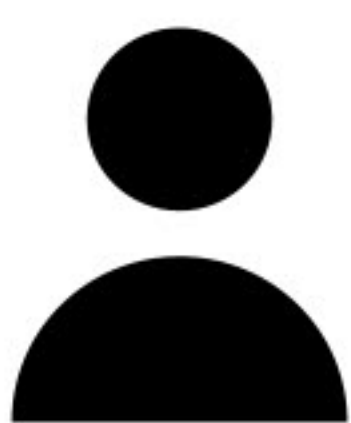

Certification specializing in routing  
and switching design for networks
